COMPAR □ In this dictionary COMPAR is used in the grammar notes beside entires to describe an adjective in its comparative form. (SUPERL is used to describe an adjective in its superlative form.) The comparative form is usually made by adding ***-er***, for example *faster*, *happier*, or by putting ***more*** before the adjective, for example ***more*** *difficult*, ***more*** *interesting*. COMPAR is used beside the comparative form of an adjective which is entered in the dictionary as an irregular form, for example **better**, or which is entered because the meaning or use of the comparative form is different from the simple form of the adjective, for example **earlier**. A few adverbs also have a comparative form. The grammar notes beside individual entries will tell you which these adverbs are. COMPAR is also used beside meanings of words which are used with a comparative adjective or adverb before or after them. Examples of words which are used with comparative structures are **ever 1.2** and **by far** (see **far 13**). EG *Information must flow faster than* ***ever*** *before... DATE □ This entry gives some ways of expressing dates. The following examples show ways of talking about dates. A date can be written as 'July 10', 'July 10th', '10 July' or '10th July', but is usually pronounced 'July the tenth' or 'the tenth of July'. However, 'July 10' is sometimes pronounced 'July ten' in American English. The year and the month are often left out of dates when it is clear which year or month you are referring to. The day of the week is usually mentioned before the rest of the date, and the year is usually mentioned after the day and month. EG *'What date is it?'–'It's the 30th today'... ...Tuesday May the thirteenth... ...Monday the fifth of April... They married on December 9, 1913... Labour was defeated in the General Election of 19 June 1970... The case was heard in the High Court in February 1910... They lived together from December of that year until June of 1970... Where were you on the nights of February 4th and 7th?... The paper he hands me has a 1975 date.* In British English, you can mention the month either after or before the day, but in American English it is

more common to mention the month first. This is especially important when dates are written just as a series of numbers, since a date such as 10/7/86 usually means July 10th 1986 in British English, but it means October 7th 1986 in American English. In British English, you usually say that something happens **on** a particular day, for example 'It happened on Thursday', but in American English you can also leave out 'on' and say 'It happened Thursday'. If you refer to the twenties, you are referring to the years between 1920 and 1929. If you refer to the 1840's, you are referring to the years between 1840 and 1849. The early sixties are the years between 1960 and 1965, and the late sixties are the years between 1965 and 1969. EG *...in Stockholm in the thirties... I went on a computer training course in the nineteen fifties.* In the following examples, the speaker or writer is referring to things that usually happen on a particular day or that repeatedly happen then. EG *I'm terribly busy on Saturdays... On Monday nights, the pupils go to the local cinema... ...every Tuesday for the next few months... I've never worked on a Saturday in my whole life.*
